

Risk Classification: Low Risk | **Risk Score Flags: 2/10** | **General Health Index: 55/100**

Bayesian Risk Probability: 49%

- ■■ Resting BP in Hypertension Stage 1 range. Adopt DASH diet principles and increase aerobic activity to 150 min/week.

- ■ Borderline high cholesterol. Replace refined carbohydrates with whole grains and healthy fats.
- ■ Multiple major vessels affected. Cardiology follow-up and potential imaging studies are strongly recommended.
- ■ Middle-age is a key period for preventive care. Establish baseline cardiac metrics with your physician.
- ■■ Men over 45 have heightened cardiovascular risk. Maintain healthy weight and avoid smoking.
- ■ Excellent! Your risk profile is low. Maintain your healthy habits — regular exercise, balanced diet, and stress management.
